

Neale Avenue, Kettering

A Little bit about us.

The home was opened in 2003. It accommodates 6 individuals with dual sensory impairments.

Each person has their own private room with en suite facilities and shares the use of communal areas

Individuals have a range of different needs. We have individuals with down syndrome, Epilepsy, microcephaly, autism, Von-Willebrand's, cerebral palsy, asthma, physical needs, early dementia and severe learning disabilities.

We have a large garden which is accessible to all individuals. Each individual has a small area of the Garden that reflects their personality. The garden has a summer house which in the winter we use as Santa's grotto. We have a disabled swing. And a small herb garden that includes mint, rosemary and thyme which are sensory smell for the individuals. The garden is bright and colourful and a relaxing area for the individuals to spend time. We have a large trampoline in the garden that one individuals' access (this is her favourite activity). We also have a paddling pool for use on hot days.

All residents have family who may visit or call on a weekly basis. One individual has an external Advocate as his family only see him a few times a year.

We have two minibuses at the service that all individuals have access to.
